Is it possible to update the physical percent complete using the import spreadsheet feature?

Status: **Reviewed**

Version(s): 5.0

Problem: Is it possible to update the physical percent complete using the import spreadsheet feature?

Fix: The ability to directly edit physical percent complete through a spreadsheet is an existing Enhancement Request. If you would like to add your company to this Enhancement Request, please select the "Send us your feedback and comments by creating a support incident here" link below.

Fix: **Workaround:**

1. Create a user-defined field with the Data Type of Number in the Activities Subject area
2. Export a spreadsheet that includes that user-defined field created in step 1
3. Update that user-defined field column in the spreadsheet with the Physical percent complete figures you want to import as well as any actual start information you want to update.
4. Import the spreadsheet
5. Run a global change where the Physical % Complete = the user-defined field in step 1.
